

SUMMARY

DevOps & Information Security engineer building automated, security-hardened infrastructure at Cloverleaf. Cut bug-bounty triage time 90% with a human-gated automation pipeline; published IEEE research hitting 0.91 AUC on malicious-URL detection. eJPT-certified, fluent across Linux, AWS/GCP/Azure, CI/CD, and offensive-security tooling.

EDUCATION

University of Cincinnati — M.Eng., Computer Science Aug 2025 – 2027
Cincinnati, Ohio · GPA: 3.958
Dhanekula Institute of Engineering and Technology — B.Tech., Computer Science 2021 – 2025
Vijayawada, India · GPA: 8.34/10

EXPERIENCE

- DevOps and Info Sec Intern Jun 2026 – Present
Cloverleaf · Cincinnati, Ohio (Hybrid)
- Designed and hardened an automated bug-bounty triage pipeline, cutting triage and response time 90% while keeping every decision human-gated.
 - Automated CI/CD and cloud provisioning (AWS CloudFormation/ECS), reducing manual deployment steps across the engineering team's Docker-based Linux/shell workflow.
 - Own information-security automation and a Governance, Risk & Compliance (GRC) program, triaging security and bug-bounty reports end to end.
 - Ship feature and reliability fixes to a production Node.js/GraphQL API and Next.js client with full test coverage.
- Machine Learning Researcher (IEEE Publication) Dec 2024 – Jun 2026
Independent Research · Vijayawada, India
- Led a 4-person research team to design and publish a malicious-URL classifier (IEEE, ICMLAS 2025), achieving 0.91 AUC with a Random Forest ensemble over 9 lexical features on 11,964 URLs.
 - Built a hybrid detection system integrating real-time Urlscan.io API verdicts, improving phishing-detection accuracy beyond the static model alone.
- Security Analyst – Job Simulation Jul 2024 – Aug 2024
Mastercard Forge Virtual Experience · Remote
- Identified and reported phishing threats as part of a simulated Security Awareness Team; designed training recommendations that modeled an 86% reduction in phishing susceptibility.
- Cyber Security Intern Jun 2024 – Jul 2024
ExcellR · Remote
- Learned and applied core network assessment methodologies in Kali Linux, including port scanning with Nmap and password auditing with Hydra and John the Ripper.
 - Practiced foundational vulnerability assessment and exploitation techniques using Metasploit, building hands-on fluency with host and network auditing tools.
- DevOps Trainer Oct 2024
Dhanekula Institute of Engineering and Technology · Vijayawada, India
- Served as lead resource person over a 5-day hands-on DevOps workshop for 120+ students, directing a team of 4 fellow resource persons.
 - Introduced Eclipse, Apache Maven, SonarQube, Sonar-Scanner, and Jenkins alongside Git/GitHub integration, including declarative Jenkins pipelines, to automate code-quality gates.
 - Closed the workshop with a group mini-project, guiding students through building and deploying a Java application end to end using the DevOps practices taught.
- Machine Learning Intern May 2023 – Jul 2023
Codegnan IT Solutions · Vijayawada, India
- Built end-to-end web-scraping pipelines (BeautifulSoup) and ran exploratory data analysis to source and clean training data for a delivery-time estimation project.
 - Trained and tested multiple machine learning models on "An Exploration of Predictive Models and Factors Impacting Delivery Time Estimation," comparing algorithms to identify the strongest predictive factors.
 - Deployed the resulting models to AWS for cloud-based inference, taking the project from raw data through a working, testable prediction service.

LEADERSHIP

- Treasurer, University of Cincinnati Telugu Association Aug 2025 – Present
- Managed and allocated a \$15,000+ budget and secured corporate sponsorship for a major university event serving 600+ attendees, directing financial planning and cross-team coordination.
 - Handled administrative operations end to end, including drafting urgent funding requests, tracking project tasks, and ensuring 100% compliance with university financial policy.
 - Served as co-anchor for the primary event program, pairing financial oversight with direct community engagement and public communication.
- Behavior Support Lead, IMPACT Innovation – University of Cincinnati May 2026 – Present
- Promoted from Student Worker/DSP (Dec 2025) to lead behavior support for adults with intellectual and developmental disabilities across work-based learning, lifelong learning, and health-related programming.

PROJECTS & RESEARCH

- Scalable Malicious URL Classification: Lexical Analysis + API Integration IEEE / ICMLAS 2025, Bangkok
- Published IEEE research analyzing the ISCXURL-2016 dataset (11,964 URLs); achieved a 0.91 AUC with a Random Forest ensemble over 9 lexical features and built a hybrid detection system with real-time Urlscan.io verdicts. (ieeexplore.ieee.org/document/10967695)

CERTIFICATIONS

eJPT – Junior Penetration Tester, INE (Jan 2025) · ICCA – INE Certified Cloud Associate (Jan 2025) · TryHackMe PT1 (Feb 2025) · Google Cybersecurity Professional Certificate (May 2024) · Cisco AI Solutions on Infrastructure Essentials (DCAIE) (Apr 2025)

SKILLS

- Security: Vulnerability Assessment, Incident Triage, Governance Risk & Compliance (GRC), Metasploit, Reconnaissance, Network Scanning & Enumeration, Post-Exploitation, Phishing/Social-Engineering Analysis
- DevOps / CI-CD: Jenkins, GitHub Actions/CI, SonarQube, Sonar-Scanner, Apache Maven, Docker, Infrastructure as Code (CloudFormation)
- Cloud: AWS (ECS, CloudFormation), Google Cloud Platform, Azure
- Programming: Python, Bash/Shell Scripting, Java, SQL, C, C++, HTML
- APIs & Platforms: Node.js, GraphQL, REST APIs, Next.js
- OS & Tools: Linux, Kali Linux, macOS, Windows, Git/GitHub, Eclipse
- Languages: English (proficient), Hindi (proficient), Telugu (native), Japanese (conversational), German (beginner)
