

Jasper Surya Chowdary Kota

Cincinnati, Ohio | kotajy@mail.uc.edu | [linkedin.com/in/jasper-surya-chowdary-kota](https://www.linkedin.com/in/jasper-surya-chowdary-kota)

SUMMARY

Computer Science graduate student and eJPT-certified security practitioner focused on DevOps automation and AI-driven threat detection. Built CI/CD pipelines with automated code-quality gates, conducts host and network vulnerability assessments, and published IEEE research achieving a 0.91 AUC on malicious-URL classification. Currently a DevOps & Information Security intern at Cloverleaf, working across code, cloud, and security. Comfortable across Linux, AWS/GCP/Azure, and offensive-security tooling.

EDUCATION

University of Cincinnati — M.Eng., Computer Science <i>Cincinnati, Ohio</i>	Aug 2025 – 2027
Dhanekula Institute of Engineering and Technology — B.Tech., Computer Science <i>Vijayawada, India</i>	2021 – 2025

EXPERIENCE

DevOps & Information Security Intern <i>Cloverleaf · Cincinnati, Ohio (Hybrid)</i>	Jun 2026 – Present
- Contribute to production systems across DevOps, infrastructure, and security under senior-engineering review, using AI-augmented development workflows. - DevOps & Infrastructure-as-Code: CI/CD improvements and AWS automation (CloudFormation/ECS); daily Docker-based local dev and Git/GitHub CI in Linux/shell. - Run information-security automation and a Governance, Risk & Compliance (GRC) program, triaging security and bug-bounty reports; build internal tooling and agent workflows to automate engineering and operational processes. - Ship feature and reliability fixes to the core platform (Node.js/GraphQL API, Next.js client) with full test coverage.	
Cyber Security Intern <i>Blackbuck Engineers (in association with APSCHE) · Remote, India</i>	Jan 2025 – Apr 2025
- Completed a 240-hour intensive internship in offensive security, threat mitigation, and vulnerability assessment. - Earned an "Excellent" performance grade across hands-on host- and network-auditing tasks.	
DevOps Trainer <i>Dhanekula Institute of Engineering and Technology · Vijayawada, India</i>	Oct 2024
- Led a team of 4 to deliver an intensive 5-day hands-on DevOps workshop, upskilling 120+ students. - Integrated Jenkins and SonarQube to automate code-quality gates, cutting manual review time on submissions. - Guided participants through building and deploying 120+ Java mini-projects via a full CI pipeline (Maven, Git/GitHub).	
Security Analyst (Job Simulation) <i>Mastercard · Forage Virtual Experience</i>	Jul 2024 – Aug 2024
- Analyzed and reported high-risk phishing and social-engineering threats on the Security Awareness team. - Drove an 86% reduction in phishing susceptibility via targeted awareness interventions and a follow-up simulation.	
Machine Learning Intern <i>Codegnan IT Solutions · Vijayawada, India</i>	May 2023 – Jul 2023
Built BeautifulSoup web-scraping pipelines and deployed ML models on AWS to optimize cloud-based inference.	

PROJECTS & RESEARCH

Scalable Malicious URL Classification: Lexical Analysis + API Integration	IEEE / ICMLAS 2025
- Published IEEE research analyzing the ISCXURL-2016 dataset (11,964 URLs) to improve phishing detection. - Achieved a 0.91 AUC with a Random Forest ensemble over 9 lexical features. - Built a hybrid detection system combining the model with real-time Urlscan.io API verdicts.	

CERTIFICATIONS

eJPT (INE Certified Junior Penetration Tester) · Google Cybersecurity Professional · TryHackMe PT1 · Cisco AI Solutions on Infrastructure Essentials (DCAIE) · ICCA (Cloud)

LEADERSHIP

Treasurer, University of Cincinnati Telugu Association (UCTA)	Aug 2025 – Present
- Manage a \$15,000 event budget and secured corporate sponsorship for events serving 700–900 attendees. - Own allocation, tracking, and 100% compliance of organizational funds under university financial policy.	

SKILLS

Security:	Vulnerability assessment, host & network auditing, Metasploit, reconnaissance, network scanning & enumeration, post-exploitation, system hacking, phishing/social-engineering analysis
DevOps / CI-CD:	Jenkins, SonarQube, Sonar-Scanner, Apache Maven, Git/GitHub
Cloud:	AWS, Google Cloud Platform, Azure
Programming:	Python, Java, SQL, C, C++, HTML
OS & Tools:	Linux, Kali Linux, macOS, Windows, Eclipse
Languages:	English (proficient), Hindi (proficient), Telugu (native), German (basic)
